

# Why add a Shelf Liner?

- **Color and Texture-**  
*Refresh existing shelving by adding color and texture with customized shelf liners.*
- **Prevent Damage-**  
*Our shelf liners prevent merchandise from sliding off shelves thus minimizing breakage and liability.*
- **Ease-**  
*The pliability of our products matched with our ability to add adhesive and cut to size reduces manufacturing costs by 60%.*
- **Durability-**  
*HyGrip is extremely durable. This shelf liner is ideal for heavy duty applications. Liners clean up with just soap and water.*
- **Green-**  
*Some of our shelf liners are made from post-consumer bottles. If you are thinking green for our future, reuse your existing shelves and refresh your department by using these products.*  
*10 bottles = 1 yard of our non-woven fabrics*

## Hytex Shelf Liners

### About us >>>

Hytex Industries has been a manufacturer of decorative textiles for over 40 years. During that time, we have developed a number of products to include woven and non-woven fabrics, cork and industrial textiles. These have been adopted by the Retail Store Fixture Industry for use as panel fabrics, shelving liners and wallcoverings.

Hytex products most commonly used by the fixture industry is our HyGrip non-skid shelving liners.

Although used primarily in the shoe, electronic, home appliance, frame and luggage department the versatility of our products offers numerous options for all areas of store design. The non-skid feature of these shelving liners have added a decorative component to metal shelving while minimizing damage to products on display. Another popular choice has been our needlepunch textiles. These products are extremely durable and constructed to withstand years of commercial and retail traffic. The construction of our

needlepunch fabrics is unique in that they are made from 100% solution-dyed polyester staple

fiber. Their physical characteristics far exceed those of our competitors and are competitively priced. Our needlepunch fabrics are all Class A rated and pass UBC 8-2. In addition to manufacturing these

Our products have reduced the production man hours by two-thirds.

materials, we provide custom services to include: color matching, pressure sensitive adhesive, die cutting and, slitting. Throughout the store fixture industry, production managers have found that our products have reduced the man hours associated with applications by as much as two-thirds.

*Refresh your departments for a fraction of the cost. No need to replace fixtures.*

- *After deciding which area to refresh, provide us with the shelf specification for your shelf liner.*
- *Choose your pattern and color.*
- *Let us do the rest!*

*We ship pieces to your location...*

*1  
Peel back  
Corner of  
Liner...*

*It is as easy as 1-2-3...*

*to install our shelf liners and refresh your departments.*

*2  
Place corner of liner and  
press down to hold liner in  
place...*

*3
